ATMOSPHERIC POLLUTION, CLEAN AIR ACT, 1956.

The Bedworth No. 1 Smoke Control Area came into operation on 1st December 1967, sited in the North West part of the Urban District, the area covers 830 acres and 865 houses.

The Bedworth No 2. Area which adjoins the Bedworth No. 1 area was submitted to the Minister for confirmation.

Measurement of Smoke concentration and sulphur dioxide content of the air is carried out with volumetric apparatus at the Council Offices, High Street, and the Nicholas Chamberlaine School, Bedworth. Measurement of deposited matter in the atmosphere is carried out by deposit gauges sited at Keresley and also at the Clinic Newtown Road, Bedworth. Readings are taken weekly and sent to the Department of Industrial Scientific Research, Warren Springs.

Below is a table showing results (to the nearest whole number) of the average daily concentration of smoke and sulphur dioxide each month.

The measurement units are in micro grammes per cubic metre, and for deposited matter in tons per sq. mile.

ACCIDENT REPORTS.

3 Accident reports were received during the year. One from a Fuel Depot, one from a shop and one from an office.

The accident at the office involved a worker closing a door.

The accident at the shop involved a fall whilst coming down a stairway.

The accident at the fuel depot was due to a steel frame falling on the workman's foot.

In the three cases none of the accidents could be attributed to any failure or neglect on the part of the employers and there was no need to take formal action.

CARAVAN SITES AND CONTROL OF DEVELOPMENT ACT, 1960.

There are 12 Licenced Caravan Sites in the Urban District on which are sited 239 Caravans.

All sites have main drainage, mains water and electricity and are in a reasonably satisfactory condition.

RODENT CONTROL.

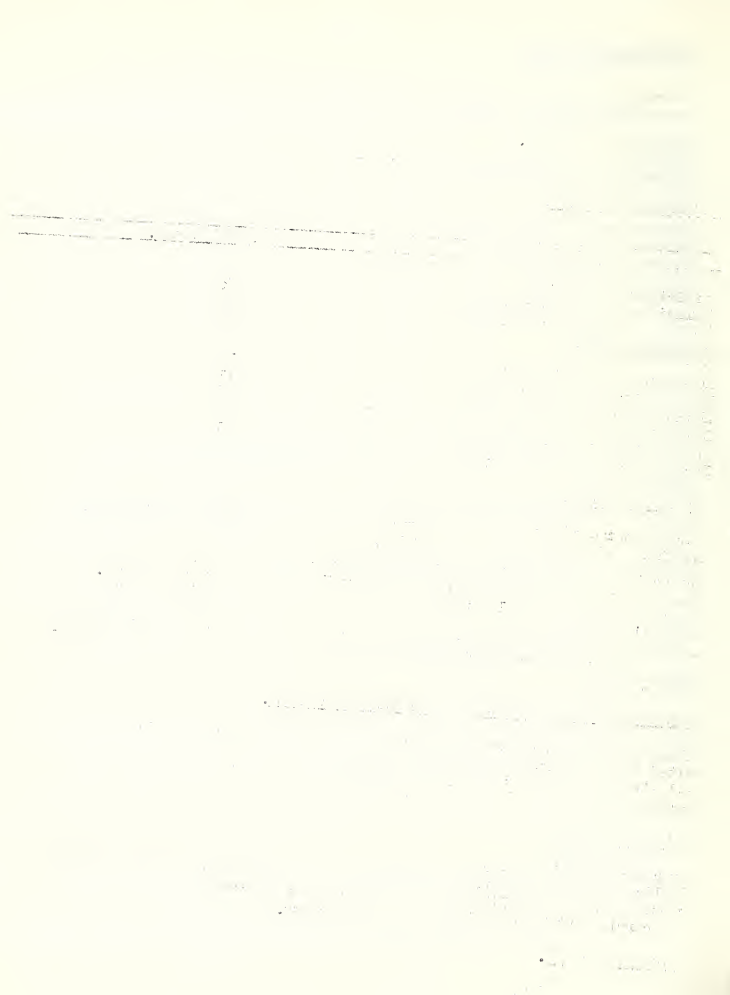

Over 348 complaints of rat infestation were received and dealt with by the Public Health Department. Some inconvenience to the Health Department was caused by the ill health of the Rodent Operator in whose absence the work was carried out by the Public Health Inspectors.

FOOD SUPERVISION.

1. Meat Inspection.

There are three licenced slaughterhouses in the area, inspections being carried out on a rota basis by the three District Inspectors.

TOTAL WEIGHT OF CONDEMNED MEAT 1 Ton. 5 Cwts. 3 Qrs.

(2) Condemned Food.

Rountine inspection of food shops and notification by retailers result in the voluntary surrender of a large variety of food as being unfit for human consumption.

TOTAL WEIGHT OF CONDEMNED FOOD. 4 Tons. 9 Cwts. 0 Qrs.

(3) Inspection and Supervision of Food Premises, including Public Houses.

The inspections are carried out to ascertain compliance with the Food Hygiene (General) Regulations 1960 and Section 89 of the Public Health Act, 1936.

Certain infringements were found during the above inspections, all such defects were remedied and in certain cases improvements to premises were made.

FACTORIES ACT, 1961.

There are 158 factories in the area. All factories were inspected during the year for the purposes of the above Act.

H. BURRISS.-

CHIEF PUBLIC HEALTH INSPECTOR.

## LABORATORY FACILITIES

The Public Health Laboratory situated at the Coventry and Warwick Hospital, Coventry, undertakes the bacteriological examination of samples of water, ice cream and food, also in the investigation of infectious diseases.

The services of the Analyst to the City of Coventry are also utilised for chemical analysis.

## THE GENERAL PROVISIONS OF THE HEALTH SERVICE.

The General Practitioner service is administered by the Warwickshire and Solihull Executive Council. There are several Medical Practitioners living in the district and others residing outside practise on the periphery.

There are no general hospital services directly available in the district but adequate out and in patient facilities are provided at the Nuneaton and Coventry Hospitals which are administered by No. 20 Group Hospital Management Committee of the Birmingham Regional Hospital Board. Cases of infectious disease are admitted to Whitley Isolation Hospital, Coventry. Out patient clinics for tuberculosis are held at Riversley Park Clinic, Coton Road, Nuneaton.

Warwickshire County Council are responsible for the administration of the School Health Service and arrangements for Domiciliary Nursing and Midwifery Services, Domestic Helps, Vaccination and Immunisation, care of mothers and young children, Care and After Care and the Ambulance Service as laid down in Part III of the National Health Service Act, 1946.

With the exception of the Ambulance Service the day by day administration of these Services is under the control of the Area Medical Officer, Area Health Department, Council Offices, Bedworth.

The Ambulance Depot is adjacent to the Infant welfare Clinic, Newtown Road, Bedworth.

## SANITARY CIRCUMSTANCES OF THE AREA

### WATER SUPPLY

The Water Supply of Bedworth is constant, and is obtained as follows:-

(a) Two sources at the Newdigate Colliery, in the West Ward of the district.

- (1) From an adit in the Frank Shaft, 270ft below ground surfaces.
- (2) From a 12" borehole, 220ft deep.

(b) 20" borehole, Bedworth Waterworks.

The borehole is 20" in diameter and 275ft deep.

(c) Exhall Deep Well.

The Well is 9ft in diameter, and approximately 260-300ft deep.

(d) Coventry Corporation.

This is used as a Supplementary supply, and is only drawn upon when necessary.

(e) Birmingham.

This is used as a supplementary supply, being piped via Nuneaton.

All this water is pumped into a storage reservoir at the Waterworks. The reservoir has a storage capacity of 750,000 galls. The water is pumped from the reservoir and boosted direct to the town. The Water Tower is now only used for night duty.

As a result of the above it is considered that the Water Supply of the area has been reasonably satisfactory in quantity.

Number of samples of Town's water submitted for analysis:- 43.
